AquaPro DOMESTIC SHOWER FILTER

It has been estimated that the skin can absorb as much chlorine in a 5 minute shower as you would receive drinking 8 glasses of water. That's a lot of chlorine! Our skin is actually the body's largest organ which is incredibly important to our overall health. The Pure Bath shower filter by AQUAPRO reduces chlorine, chemicals and metals while also softening and energising the water molecules.

FEATURES & BENEFITS

6 STAGE PROCESSING SYSTEM

- 1) **Activated Carbon**- Chlorine and chemical reduction + Bad taste & Odour removal
- 2) **KDF** – Chlorine and Heavy Metals removal plus Bacteria Control
- 3) **Calcium Sulfite** - Chlorine removal – Combined with the Carbon & KDF, ensures effective chlorine removal.
- 4) **Anisotropic Ferrite Magnet**- Softens Water and reduces scale build up on shower walls.
- 5) **Activated Ceramic Ball**- Energizes and Oxygenates. Water activated by the high-energy tourmaline ball is oxygenated and energised, restoring the natural primitive active state of the water molecule.
- 6) **High Flow Sediment Filtration** - Removes Impurities

(Note most other inferior brands only contain Activated carbon and sometimes KDF ! These will not perform as well or last as long as the MK808 filter system).
Made with pride in Taiwan.

- 15 mm In/Out Ports fits all standard shower connections. Ideal for use with adjustable showers using a flexi hose.
- Up to 45,000 litres water use or approximately 6 month Life for a family.
- Improved sudsing and lathering of soap and shampoo.

This Pure Bath shower filter includes Magnetic wave for an Energized Shower Experience! Creates a softer feel and improves lathering. It is designed with performance in mind and features a multi stage filtering process.

Using a Water Filter for showering / bathing has HUGE benefits. The skin is your body's largest organ. It absorbs harmful chemicals, especially when immersed in water and when hot. This is why taking long showers is actually regarded as a health risk! When you shower in hot water you also breathe in a lot of chlorine vapour (a poison gas). Up to 50% of our exposure to this harmful chemical happens in the shower! Showering in chemical treated water also destroys your hair and aggravates skin and eyes.

Removing harmful chemicals is a great solution - with these benefits:

Benefits of Using a Shower Filter

1. Using a shower filter is one of the easiest and most effective ways to reduce harmful exposure to chlorine and other chemicals.
2. Showering in filtered water results in greater respiratory health by reducing the risk of asthma and bronchitis from chlorine inhalation
3. Children, who are particularly at risk of the harmful effects of chlorine inhalation, benefit especially from the removal of chlorine from showering water.
4. Without the drying effects of chlorine, skin becomes softer, healthier, and younger looking.
5. Removing chlorine from showering water helps reduce the presence of skin rashes , dermatitis and eczema.
6. Because the hair is able to preserve its natural moisturizing oils, it becomes softer and healthier when chlorine is removed from showering water.

Note : Must be used with 'Mains pressure' hot water supply.

Not suited to 'Low Pressure' Hot water systems.

(All electric cylinders will have a label stating either low or mains Pressure. Gas systems are mains Pressure. (Not suited to Felton Low pressure systems with a swivel ball joint as there is no connection thread). If used with low pressure water, the water flow will be reduced to the shower head.

Only \$95.00

(That's only \$3.65 per week with six months use by your family!)

Easy to Install.

- Slide Showers -Takes two minutes and requires just a spanner or pliers to tighten the hose connections.
- Fixed Shower heads – unscrew the rose and fit the filter between the rose and chrome pipe.

Installation Note.

When installing on a shower with a sliding flexi hose, you will require an additional short flexi hose & chrome joiner to connect the elbow to the filter body. This hose and chrome thread connector are an additional \$25.00 making the total set \$120.00.
